Enfriadora y Agua Caliente Instantánea - Evercold

EVERCOLD

Water Chiller

The EverCold System features a large capacity reserve and rapid recovery design for a constant flow of cold water. Low energy consumption and operates quietly. Power: 2.1 amps. EverCold is 15" high, 8" wide, and 14" deep. There must be a 2" clearance all around the EverCold, and ventilation of the undersink cabinet is strongly recommended for effective cooling performance. Generous 1.5 gallons per hour capacity.

Fuente de Agua Fría - Oasis

Aquabar Water Cooler

OASIS® Aqua Bar™ Cooler - The most flexible point-of-use cooler, bar none.

OASIS® Aqua Bar™ Cooler is designed to work with either your water filter system or your reverse osmosis system. Featuring a stylish yet durable blow-molded polycarbonate cabinet, the Aqua Bar™ cooler provides a continuous water supply in three temperatures: hot, room, and cold. Plus, a large reservoir eliminates a bladder tank and is easily removable for cleaning and sanitation.

Eclipse 3+
Point of Use Cooler

The **Eclipse 3 Plus** cooler features a larger reservoir providing you with three gallons of filtered water on demand. The contemporary styling and modular plastic cabinet resists cracks, fading and yellowing. Maintenance is kept simple, with dishwasher safe removable reservoir and drip tray. To keep your cooler shiny and new, simply clean with soap and water or any typical household cleaner. The Eclipse 3 Plus is available in either room & cold or Tri-Temperature servings.
